Resubmitted: September 15, 2008

TO: Rebecca A. Humphries, Director

INFORMATION: Natural Resources Commission

SUBJECT: Lake St. Clair - Detroit River Boundary Designation (FO-242)

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

Discussion and Background:

Several years ago, changes to our coolwater fishing regulations established separate walleye possession and minimum size limits upon the waters of Lake St. Clair and the Detroit River. A review of state law and related fisheries orders revealed that no specific boundary existed between the two water bodies at that time. As a result, this order (new boundary definition) was established. This order established a line extending due south of the Windmill Point Light, Wayne County, as the boundary line between these two water bodies for the purposes of coolwater sport fishing regulations.

Recent discussions between the unit manager and local conservation officers indicate that this definition seems to be the best definition for describing these waters. Anglers are able to discern the boundary from the landmark without much difficulty. This order is set to expire on March 31, 2009 and it is highly recommended that it be renewed without change.
